7. Would you consider attending one of our future events and/or recommend it to your colleagues?

9th EASN International Conference Evaluation Results

8. Please give us any feedback you consider important for us to take into account for our future events:

(35 participants responded to this question)

Venue & Facilities

- Session rooms difficult to be found and far from each other

Agenda / Presentations

- Too many parallel sessions far away from each other
- The content for space related topics was too small
- Final agenda at a glance was unreadable
- Complete proceedings / presentations not available
- Longer breaks necessary for networking

Food and Beverage

- Long lines for food and drink
- Lack of enough tables at the lunch area. People had to sit down at the stairs in order to eat.
- Food was good and so was the welcome drink
- Provided lunch was very limited for vegetarian, and not labelled

Key Notes / Special Guests

- Excellent keynotes
- More participation from Policy makers, and EU officials should be advisable

Secretariat staff

- Perfect on-site secretariat
- The staff was very friendly and helpful

Conference Dinner

- The beginning of the dinner was too late (main dish at 22.30)
- A better place for Conference Dinner where a better socializing is manageable

General Comments

- Some social networking platform could be leveraged - research gate or other - so if you missed a session/presentation, could connect with the presenter
- Maybe people could allow - respecting the GDPR - their contacts to be available for other participants to contact
- Streaming some of the key notes
- General presentation guidelines may help some presenters
- The human contact during the conference was pleasant with open people which also reveal the real positive mind-set and spirit of this event
- Congratulations for the organization effort and all involved, it was a pleasure to participate in another EASN conference and see its continuing growth
